

Babu Madhav Institute of Information Technology, UTU

5 years Integrated M.Sc. (IT) (6th Semester)

Subject: 060010606 – DSE12 Open Source Web Technology

CIE 1 Remedial

Date: 20th April, 2020

Marks: 30

Duration: 90 Mins.

1. Develop PHP website for “MonGinis Cake shop” by providing following [30] functionality.

- ❖ Design six menu items namely Home, About Us, Our Products, Order, view order and Gallery.
- ❖ Use common header including menu and common footer for all pages.
- ❖ Design cake order form with necessary field and proper validation. Order should be display in view order page in proper format.
(Field like Cake Type, Size, quantity, occasion (Birthday /Anniversary/engagement), delivery date, address and other detail).
 - Amount of cake is calculated automatically based on type, size and quantity.
Assume that only two types of cake is available.

Cake Type	Size	Amount per cake	Size	Amount	Size	Amount
Black Forest	250 gm	200	500 gm	380	1 kg	750
Choco chips	250 gm	250	500 gm	480	1 Kg.	850

- ❖ You have to implement class concept in order and view order page like retrieving from details, display details etc.
- ❖ Use “body” image as background for each page.

Logo	Website Name
